Ronan Martorell
SAS Administrator
Lincoln
France

"Managing SAS metadata security with Metacoda Security Plug-ins is such a treat with the ability to make decisions to resolve issues quickly and confidently."

David Shannon
Technical Director
Amadeus Software
England

"Metacoda Plug-ins helped us to overhaul and strengthen our complex security model extremely quickly due to the very visual interface, reducing our acceptance tests by half. The interface is easy to use and feature rich for exploring and exporting SAS metadata, allowing us to be more agile in business."

Frank Boggasch
Head of Business
Intelligence Reporting
DeutschlandCard GmbH
Germany

"Metacoda's SAS Management Console Plug-in should be a standard product for SAS platform administrators. By providing 360 degree vision of security on your platform from a single location, it is essential for any organisation with auditable or demonstrable security requirements."

"Our customers demand the highest productivity from SAS customer technical support. Metacoda Plug-ins provide the SAS technical support team with a simple, seamless interface to understand the many relationships and permissions within the SAS metadata environment. Metacoda Plug-ins save a huge amount of time and effort in providing a clear, well presented view of SAS security metadata. It has become a tool that SAS technical support staff regularly use to resolve complex customer issues."
